I. ENTRIES

1. Anon 1972
Towards the formulation of the fifth plan: Position papers on agricultural research, education and manpower: Animal Sciences: Fisheries: Indian Fmg., 22(8): 45 p.

2. Antony, A.D. 1972
(Department of Zoology, St. Thomas College, Trichur, Kerala)
Sexual dimorphism in the black-banded carp Barbus melanampyx (Day) J. Inland Fish. Soc. India, 4: 201-202

Morphological differences of the two sexes of B. melanampyx have been presented in tabulated form. The author has reviewed the observation made earlier on the same species. 9 ref.

3. Bernice, R. 1971
(Department of Biological Sciences, Madurai University, Madurai-2, South India)
The succinic dehydrogenase activity of Streptocephalus dichotomus Baird. Hydrobiologia, 38(3-4): 465-471

4. _____ 1971
(Department of Biological Sciences, Madurai University, Madurai-2, South India)
Food feeding and digeston in Streptocephalus dichotomus Baird (Crustacea : Anostraca)
Ibid, 38(3-4): 507-520

5. _____ 1971
(Department of Biological Sciences, Madurai University, Madurai-2, South India)
Respiration of Streptocephalus dichotomus Baird (Crustacea: Anostraca) Ibid, 38(3-4): 541-552)

6. _____ 1972
(Department of Biological Sciences, Madurai University, Madurai-2, South India)
Biochemical composition of Streptocephalus dichotomus Baird Branchinella Kugenumaensis (Ishikawa) (Crustacea: Anostraca). Hydrobiologia, 39(2):155-164. 15 ref.

7. _____ 1972
(Department of Biological Sciences, Madurai University, Madurai-2, South India)
Ecological studies on Streptocephalus dichotomus Baird (Crustacea : Anostraca). Hydrobiologia; 39(2):217-240. 54 ref.

8. _____ 1972
(Department of Biological Sciences, Madurai University, Madurai-2, India)
Hatching and po t embryonic development of Streptocephalus dichotomus Baird (Crustacea: Anostraca). Hydrobiologia, 40(2):251-278.

Effects of desiccation, temperature and depth on hatching and post embryonic development of S. dichotomus have been described. The author has described 15 larval stages and reported that sex-differentiation appears at the 8th stage of post embryonic development of the species. 35 ref.

9. Bhanot, K.K. 1973
(Central Inland Fisheries Research Institute, Barrackpore, West Bengal).
Common fishing methods in our country. Indian Farmers Digest 6(1):15-19.

Describes in brief various nets and gears in operation in inland waters in India.

10. Bhanot, K.K. and V. Gopalakrishnan 1972
(Central Inland Fisheries Research Institute, Barrackpore, West Bengal).
Observations on the collection of fry of the mullet Mugil parsia Hamilton with standard spawn collection nets. J. Inland Fish. Soc. India, 4 : 205-206. 3 ref.

11. Bhatnagar, G.K. 1972
(Co-ordinated Project on Reservoir Fisheries, Nagarjunasagar, Andhra Pradesh).
Maturity, fecundity, spawning season and certain related aspects of Labeo fimbriatus (Bloch) of river Narmada near Hoshangabad. Ibid, 4 : 26-37. 11 ref.

12. Bhimasena Rao, J. and R.K. Dwivedi 1972
(Small Reservoirs Unit of C.I.F.R.I., Rewa, M.P).
On the recovery and growth of silver carp (Hypophthalmichthys molitrix) from Kulgarhi reservoir (M.P.). Ibid, 4 : 214-215. 2 ref.

13. Chandrasekhar, K and D. Khosa 1972
(Surgical Research Laboratory, Institute of Medical Sciences, Banaras Hindu University, Varanasi-5).
Effect of mammalian estrogens and progesterone on the hypothalamo Adeno hypophysical complex of ovariectomised catfish Clarias batrachus (Linn.). Proc. Ind. Acad. Sci., B, 76(6):240-250.21 ref.

14. Chatterjee, S.N. 1973
(Deputy Director of Fisheries, Gandhisagar Dam, M.P.)
Controlling aquatic insect in nursery ponds. Indian Farmers' Digest, 6(1):46-47

15. Chondar, S.L. 1972
(Regional Training Centre for Inland Fisheries Operatives, Agra).

Length-wight relationship of mature female Labeo gonius (Hamilton) from the Keetham reservoir. J. Inland Fish. Soc. India, 4:216-217. 5 ref.

16. Das, B.C. 1972
(Biometry Research Unit, Indian Statistical Institute, Calcutta-35, India).
Effect of density on survival of Indian freshwater carp during the first two weeks of life. Aquaculture, 1(2): 199-212.

The effects of density on the survival of carp fry during the first two weeks of life has been reported. The effects could be reduced by the application of vitamins. 5 ref.

17. Das, P.R. 1972
(Estuarine Fisheries Research Unit of Central Inland Fisheries Research Institute, Kakdwip, West Bengal).
Some observations on the macrovegetation in and around 'Bheris'of Sunderbans, West Bengal. J. Inland Fish. Soc. India, 4:210-211. 3 ref.

18. Datta,P., K. Alagaraja, P.M. Mitra and G.C. Laha 1972
(Central Inland Fisheries Research Institute, Barrackpore, West Bengal).
Examination of the efficacies of some sampling procedures in the estimation of fish landings. Ibid, 4:194-197

efficacies of three sampling procedures, e.g., simple random sampling without replacement, Systematic sampling and stratified sampling in the estimation of fish landings have been compared. According to authors systematic sampling is superior to other two types of sampling from the point of view of efficiency of the estimate. 2 ref.

19. David, A., G.C. Panicker and D.P. Chakraborty 1972
(Central Inland Fisheries Research Substation, Cuttack).
Eradication of unwanted airbreathing predatory fish and aquatic insects from nursery ponds by selective poisoning. Ibid, 4:189-193.

Use of different chemicals viz., Benzene, nitrobenzine etc. as selective poisoin for eredication of harmful fishes and insects have been delt with. Results of experiment, as reported by the authors, show that benzine and turpentine are effective against murrels while the later is also effective against notonectids. 8 ref.

20. De, G.K. 1972
(Directorate of Fisheries, Govt. of Tripura, Dharmanagar, Tripura).
On the spawning of cultivable carps in the dead river, Jalai : Tripura (India). Ibid , 4 :183-188. 2 ref.

21. Dehadrai, V. Padmakar[1] and Shyam Ratan Banerji[2] 1973
([1]All India Coordinated Project on Air-breathing Fishes (I.C.A.R.). [2]Dept. of Fisheries, Govt. of Bihar, Darbhanga, Bihar).
Culture of air-breathing fishes. Indian Farmers' Digest, 6(1):41-43, Contd. on page 45.

Potentialities, breeding, food, growth and maturity, stocking and harvesting of air-breathing fishes especially of common species of Anabas, Heteropneustes and Clarias have been dealt with. Cage culture of air-breathing fishes has also been discussed.

22. Hameed Shahul, M. and N. Krishna Pillai 1972
(Marine Biology laboratory, University of Kerala, Trivandrum-7, South India).
Description of the hitherto unknown male of Hermilius (Copepoda : Caligidae.). Hydrobiologia, 40(2):209-213. 5 ref.

23. _____ 1972
(Marine Biological Laboratory, University of Kerala, Trivandrum-7, India).
Redescription of Parapetalus longipinnatus Rangnekar (Copepoda : Caligidae). Ibid, 40(3):329-334.

Redescription of females of P. longipennatus collected from carangid fishes is given. 4 ref.

24. Hanumantha Rao, L. 1972
(Central Inland Fisheries Research Institute, Barrackpore, West Bengal).
Observations on the biology of Parastromateus niger (Bloch) and Pampus chinensis (Euphrasen) from the Godavari estuary. J. Inland Fish. Soc. India, 4:207-209.

Some observations of the biology of two commercially important species of pomfrets have been presented. 4 ref.

25. Jhingran, A.G. 1972
(Central Inland Fisheries Research Substation, 30, Panna Lal Road, Allahabad-2).
Fluctuations in the ponderal index of the Gangetic anchovy, Setipinna phasa (Hamilton). Ibid, 4:1-9.
16 ref.

26. Jhingran, V.G. 1972
(Director, Central Inland Fisheries Research Institute, Barrackpore, West Bengal).
Recent advances in inland fisheries. Indian fmg, 22(6):115-117.

The article deals with the achievements made in the field of inland fisheries research in India. The author has also discussed the present status of brackishwater fisheries in India and suggested measures to develop the same.

27. _____ 1973
(Central Inland Fisheries Research Institute, Barrackpore, West Bengal)
Fish culture in India. Indian Farmers' Digest 6(1):11-14.

28. Kaliyamurthy, M. 1972
(Pulicat Lake Unit, Central Inland Fisheries Research Institute, 19-A, Patel Road, Madras-11)
Notes on the brackishwater mysid, Mesopodopsis orientalis (Tattersall) of the Pulicat lake. J. Inland Fish. Soc. India, 4:198-200 . 7 ref.

29. Kaliyamurthy, M and K. Janardhana Rao 1972
(Central Inland Fisheries Research Institute, 19-A, Patel Road, Madras-11)
Preliminary observations on the food and feeding habits of some fishes of the Pulicat lake. Ibid, 4:115-121.

Food and feeding habits of 37 species of fish grouped into 4 feeding types have been presented. 9 ref.

30. Khan, H.A and S.K. Mukhopadhyay 1972
(Central Inland Fisheries Research Institute, Barrackpore, West Bengal).
On the fecundity of climbing perch, Anabas testudineus (Bloch). Ibid, 4:212-213. 3 ref.

31. Khosa, D and K. Chandrasekhar 1972
(Surgical Research Laboratory, Institute of Medical Sciences, Banaras Hindu University, Varanasi-5).
Effect of copper acetate and asphalt on gonadal activities and the correlated changes in the pre-optic nucleus of two Genera of teleostean fishes, Clarias batrachus (Linn.) and Ophiocephalus punctatus (Bloch) Proc. Ind. Acad. Sci., B, 76(6):229-239. 20 ref.

32. Koshy Mammen 1972
(Zoological Survey of India, 8, Lindsay Street, Calcutta-16).
A comparative study of the segments of the chelipeds in the two sexes of Macrobrachium lamarrei (H. Miline Edwards) (Decapoda, Caridea). J. Inland Fish. Soc. India, 4:10-14. 7 ref.

33. Krishnankutty, M[1], B. Narayanan[2] and C.V. Mathew[3] 1972
([1&2]Regional centre, National Institute of Oceanography, P.B. No. 1913, Cochin-18. [3]Central Marine Fisheries Research Institute, Cochin-11).
The occurence of Cynoglossus dubius Day off Kerala coast. Curr. Sci., 41(21):781-783.

Distribution & distinguishing characters of Cynoglossus dubius have been dealt with. 5 ref.

34. Lakshmanan, M.A.V. 1973
(Central Inland Fisheries Research Substation, Cuttack)
All about cultivable species of fishes. Indian Farmers' Digest, 6(1):25-28.

35. Mathur, D.S. and G.M. Yazdani 1973
(Desert Regional Station, Zoological Survey of India, Jodhpur).
Additional records of fish from Jodhpur with a list of species occuring in the district. Sci. & Cult., 39(2):87-89. 9 ref.

36. Menon, N.K. 1973
(Superintendent of Fisheries (Biology), Inland Fisheries Research Station, Ukai, Gujarat).
Fish as a nutritive food. Indian Farmers' Digest, 6(1):44-45.

The nutritive value of fishes and their role in human and animal nutrition have been described in detail.

37. Moitra, S.K. 1973
(Department of Zoology, Burdwan University, Burdwan, West Bengal).
The feeding habits of some common freshwater fishes of Uttar Pradesh. Ibid, 6(1):48-49.

Food and feeding habits of some herbivorous, omnivorous and carnivorous fishes of Uttar Pradesh have been dealt with. Seasonal variation of food and feeding intensity have also been discussed.

38. Moitra, S.K. and G.M. Sinha 1972
(Zoology Department, Burdwan University, Burdwan, West Bengal).
The structure, distribution and probable function of taste buds and mucous cells in the alimentary tract during the life history of Cirrhina mrigala (Hamilton). J. Inland Fish. Soc. India, 4:103-114. 31 ref.

39. Mukhopadhyay, S.K. 1972
(Central Inland Fisheries Research Institute, Barrackpore, West Bengal).
Observations on the extended spawning phase of Heteropneustes fossilis (Bloch). Ibid, 4:203-204.

Reports that the spawning season of H. fossilis can be extended from June to December by exposing them to long photo periods. 8 ref.

40. Murty, T.S.N. and K.V. Rama Rao 1973
(Southern Regional Station, Zoological Survey of India 3, Kandaswamy Gramin Street, Mylapore, Madras-4).
The common Indian pond frog : Rana cyanophlyctis Schneider An alternate specimen for laboratory studies. Curr. Sci., 42(1):33-34.

Distinguishing characters of R. cyanophlyctis have been given. The authors are of the opinion that it can be used as test animal in the laboratory and provideaan alternative for R. tigrina and R. hexadactyla which are now commercially used for export to western countries.

41. Natarajan, A.V. 1972
(Project Co-ordinator, All India Co-ordinated Reservoir Fisheries Project, Hazaribagh).
Progress of fisheries research in reservoirs.
Indian fmg, 22(6):120-121.

The bioecosystem of reservoirs together with the fish production have been presented.

42. Natarajan, A.V.[1] and S. Patnaik[2] 1972
([1]Central Inalnd Fisheries Research Substation, Hazaribagh. [2]Central Inland Fisheries Research Substation, Cuttack).
Embryonic and larval development of Chilka mullet Liza macrolepis (mith). J. Inland Fish. Soc. India, 4: 15-19.

Breeding ground and spawning of L. macrolepis have been described. Characteristic feature of the eggs early embryonic development and development at the larval stage have also been discussed. 16 ref.

43. Natarajan, P. & N. Balakrishnan Nair 1972
(The Marine Biological laboratory, University of Kerala, Trivandrum-7, Kerala, South India).
Observations on Pseudocycnus armatus (Bassett-Smith) parasitic on Indocybium guttatum (Bloch and Schn.).
Hydrobiologia, 40(1):69-76.

Observations on anchoring organs, position of attachment pathological effects etc. of P. armatus, a parasitic copepod, parasitising on I. guttatum have been presented. 7 ref.

44. Oppenheimer, R.J[1] and Rajtilak[2] 1972
([1]Laboratory of Ecology & Behaviour Department of Pathology, Johns Hopkins University, 615 North Wolfe street, Baltimore, Maryland 21205, U.S.A. [2]Zoological Survey of India, Indian Museum Building, Calcutta-13).

Pond fish culture in Singur, District Hooghly, West Bengal. J. Inland Fish. Soc. India, 4 : 51-60

Results of traditional fish culture practices from 102 ponds of Hooghly, West Bengal have been given. The results of Tilapia and common carp culture without fertilization and management have also been given. A detailed account of fishes commonly encountered in the ponds and their preference by consumers have also been presented. 3 ref.

45. Parameswaran, S. 1973
(Central Inland Fisheries Research Institute, Bhadra Reservoir Project, Shimoga District. Mysore State).
Grow fish for profit and pleasure. Indian Farmers' Digest, 6(1):21-24.

46. _____ 1973
(Central Inland Fisheries Research Institute, Bhadra Reservoir Project, Shimoga District, Mysore).
Production of quality fish seed by induced breeding - A brak through in fish culture. Ibid, 6(1):35-39.

47. Pillai, V.K. 1972
(Director, Central Institute of Fisheries Technology, Cochin).
Technological research in India's fisheries development. Indian Fmg, 22(6):112-114 contd on 117.

The author has discussed the commercial fishing and proper exploitation of the fisheries by mechanisation of the crafts and gears. Achievements made in the field of fish processing have also been discussed.

48. Rabindranath, P. 1971
(Department of Zoology, N.S.S. College, Pandalam, Kerala, India).
Haustoriid amphipods (Crustacea) from India. Hydrobiologia, 38(3-4):521-539. 12 ref.

49. _____ 1972
(Department of Zoology, N.S.S. College, Pandalam, Kerala, India).
Marine Gammaridea (Crustacea: Amphipoda) from the Indian region -- Family: Amphilochidae. Ibid, 39(4):509-526. 15 ref.

50. Raghu Prasad, R. 1973
(Indian Council of Agricultural Research, New Delhi).
New horizons in fisheries Research. Indian Farmers' Digest, 6(1):7-10.

Progress of fisheries research and development in India are discussed.

51. Raghuraman, R. 1973
(Zoology Department, Bangalore University, Bangalore-1, India).
Effect of body weight on intake and conversion of food in the fish Rasbora daniconius. Curr. Sci., 42(1):24-25.

The relationship of body size and rate of feeding and conversion in R. daniconius have been described. 4 ref.

52. Ramachandran, V. and T. Ramaprabhu 1973
(Central Inland Fisheries Research Substation, Cuttack).
Weed control in fish culture. Indian Farmers' Digest, 6(1):29-32 contd. on page 34.

53. Ramamohana Rao, G and L. Hanumantha Rao 1972
(Krishna Godavari Unit of Central Inland Fisheries Research Institute, Rajahmundry (Andhra Pradesh).
On the biology of Labeo calbasu (Ham. Buch.) from the river Godavari. J. Inland Fish. Soc. India, 4:74-86.

Length-weight relationship, maturity and fecundity etc. of L. calbasu from the Godavari river have been discussed. The authors have reported that the growth checks in the scales were found annual in nature. Probable causative factors for annulus formation have been discussed. 14 ref.

54. Rao, N.G.S.[1], P. Ray[2] and K. Gopinathan[3] 1972
([1]Central Inland Fisheries Research Substation, Cuttack. [2]Central Inland Fisheries Research Substation, Allahabad. [3]Pulicat lake unit of Central Inland Fisheries Research Institute, 19-A, Patel Road, Madras-11).
Observations on the spawning of Cirrhina reba (Hamilton) in the Cauvery and Bhavani rivers. Ibid, 4:69-73

Effects of different factors viz., floods, temperature etc., for the breeding of C. reba have been discussed. The authors are of opinion that temperature has no specific effect on breeding. 15 ref.

55. Sastry, K.V. 1972
(Zoology Department, D.A.V. College, Muzaffarnagar, U.P.).
Amino triphosphadase activity in three teleost fishes. Proc. Indian Acad. Sci., B, 76(6):251-257.

Amino triphosphadase activity of Clarias batrachus, Cirrhinus reba and Channa punctatus has been described. The sites of secretion of this enzyme in the alimentary canal and the optimum pH for activity of the enzyme have also been presented. According to the authors the mode of secretion of the enzyme in the pancreas in fishes indicates that the distribution of proteases in fishes is not similar to that of mammals. 8 ref.

56. Saxena, R.K. 1972
(Central Inland Fisheries Research Substation, Allahabad).
Studies on the maturity and fecundity of Rita rita (Hamilton) of Ganga river system. J. Inland Fish. Soc. India, 4:169-182.

Sexual dimorphiam, sex-ratio, fecundity and spawning of Gangetic bagrid, Rita rita have been presented. The author has described 10 maturity stages and observed more than one spawning of the fish in a season. 30 ref.

57. Seenayya, G. 1972
(Hydrobiological Laboratory, Department of Botany, Osmania University, Hyderabad-7, Andhra Pradesh, India).
Ecological studies in the plankton of certain freshwater ponds of Hyderabad- India II. Phytoplankton-2. Hydrobiologia, 39(2):247-271. 48 ref.

58. Selvaraj, C.[1], S. Radhakrishnan[2] and S. Parameswaran[3] 1972
([1]All India Project on Reservoir Fisheries, Bhavanisagar, Tamil Nadu. [2]Pulicat lake Unit of Central Inland Fisheries Research Institute, 19-A, Patel Road, Madras-11.
[3]All India Co-ordinated Project on Live fish Culture, Bhadra, Mysore).
Notes on the breeding season, fecundity and life history of a minor carp. Labeo boggut (Sykes). J. Inland Fish. Soc. India, 4:87-97. 14 ref.

59. Sen, D.P. 1972
(Central Food Technological Research Institute, Mysore).
Sea-food industry in India - its present state and scope. Indian Farmers' Digest , 5(9):19-21.

60. Sen, P.R. 1972
(Central Inland Fisheries Research Substation, Cuttack, Orissa).
Cytological studies of the pituitary gland of female Labeo rohita (Hamilton) during different stages of maturity. J. Inland Fish. Soc. India, 4:20-25. 14 ref.

61. Singh, C.S. 1973
(College of Basic Science & Humanities, G.B. Pant University of Agriculture & Technology, Pantnagar).
Aquarium delights your home. Indian Farmers' Digest, 6(1):53-54 contd. on page 56

The article deals with different aspects of aquarium fishes and aquarium.

62. _____ 1973
(College of Basic Science & Humanities, G.B. Pant University of Agriculture & Technology, Pantnagar).
Fish farmers can earn more wealth by supplementary fish feeding. Ibid, 6(1):55-56.

Different artificial fish food and their doses for fry and fingerlings have been presented.

63. Singh, J.P. 1972
(Department of Zoology, Christian College, Mattandam, K.K. Dist., Madras State, South India).
Studies on the food and feeding of the freshwater calanoid Rhinediaptomus indicus Kiefer. II. Diurnal variations in feeding propensities. Hydrobiologia, 39(2):209-215. 4 ref.

64. Singh, K.P. 1973
(Department of Biological Sciences, College of Basic Science & Humanities, G.B. Pant University of Agriculture and Technology, Pantnagar).
The fish food cycle. Indian Farmers' Digest, 6(1):50-52.

65. Singh, S.B., K.K. Sukumaran, P.C. Chakrabarti and M.M. Bagchi 1972
(Central Inland Fisheries Research Substation, Cuttack, Orissa).
Observation on composite culture of exotic carps.
J. Inland Fish. Soc. India, 4:38-50

Different aspects of composite culture of exotic carps e.g. Hypophthalmichthys molitrix, Cyprinus carpio and Ctenopharyngodon idella, have been dealt with. Detail economics of fingerling and large fish culture and production of fish/ha/yr. have also been given. 14 ref.

66. Sinha, M. 1972
(Central Inland Fisheries Research Institute, Barrackpore).
Observations on the biology of Puntius sarana (Hamilton) of Loni reservoir (M.P.). I. Length-weight relationship, Food and condition factor. Ibid, 4:122-131. 14 ref.

67. Sinha, V.R.P. 1972
(All-India Co-ordinated Project on Composite Culture of Indian and Exotic Fishes, Central Inland Fisheries Research Institute, Barrackpore, West Bengal).
Composite fish culture in India. Indian Fmg, 22(6):118-119.

Various aspects of composite culture of Indian and exotic fishes viz; species combination, manuring, rate of stocking and economics have been discussed.

68. Sreenivasan, A 1972
(Hydrobiological Research Station, Madras-10).
Limnology of a seepage type impoundment, Odathurai tank. J. Inland Fish. Soc. India, 4:162-168. 10 ref.

69. Talwar, P.K. 1973
(Zoological Survey of India, 27, Jawharlal Nehru Road, Calcutta-13).
Record of the adult bathypelagic fish, Lestidium japonicum Tanaka (Family :Paralepididae) in the Indian ocean. Curr. Sci., 42(2):64-65. 4 ref.

70. Talwar, R.K. and N.K. Sinha 1972
(Zoological Survey of India, Calcutta-13).
Johnius carutta Bloch, 1793 (Sciaenidae : Pisces), description of the neotype. J. Inland Fish. Soc. India, 4:98-102. 7 ref.

71. Tilak Raj 1972
(Zoological Survey of India, Calcutta).
A study of the freshwater and estuarine fishes of Goa. I. Acanthophthalmus goaensis, a new cobitid from Goa, with notes on Zenarchopterus striga (Blyth). Ibid, 4 : 61-68.

Describes a new species (A. goaensis) of Cobitid fish from Goa. Interrelationship of the species with other members of the genus have been discussed. Systematic position of Z. striga has also been dealth with. 16 ref.

72. Unni Sankaran, K. 1971
(Department of Botany, Govt. College of Science, Raipur, M.P.).
An ecological study of the macrophytic vegetation of the Doodhadhari Lake, Raipur, M.P., India. Hydrobiologia, 38(3-4):479-487. 6 ref.

73. _____ 1972
(Department of Botany, Government Science College, Raipur (M.P.) India).
An ecological study of the macrophytic vegetation of Doodhadhari Lake, Raipur, M.P. 3. Chemical factors. Ibid, 40(1):25-36. 14 ref.

74. Vijayaraghavan, Sumitra 1971
(Department of Biological Sciences, Madurai University, Madurai-2, South India).
Seasonal variation in primary productivity in three tropical ponds. Ibid, 38(3-4):395-408. 24 ref.

75. Chakraborty, R.D & D.S. Murty 1972
(Central Inland Fisheries Research Substation, Cuttack, India).
Life history of Indian major carps Cirrhinus mrigala (Ham.), Catla catla (Ham.) and Labeo rohita (Ham.). J. Inland Fish. Soc. India, 4:132-161
13 ref.

II AUTHOR INDEX

Every author's name appearing in the original article is listed alphabetically, including corporate bodies (Societies, organisations etc.), whether occurring as single - or multiple words. (Reference is given to the serial no. of the entry).

III. Subject Index

(Subject headings with their sub-headings are listed alphabetically. Reference is given to the serial number of the entry).

BIOCHEMISTRY	...	6
CYTOLOGY & GENERICS Cytology	...	60
DISTRIBUTION AND ECOLOGY		
Distribution	...	33,35 & 69
Ecology	...	68,72 & 73
FISH CULTURE Aquarium culture	...	61
Freshwater fish culture	...	21,44,65 & 67
General	...	27
FISH EGGS, LARVAE & JUVENILES		
Embryology and Development	...	42
FISH PATHOLOGY	...	23 & 43
FISH TECHNOLOGY	...	13,47 & 55
FISHERIES BIOLOGY AND POPULATION DYNAMICS	...	11,12,15,20,24, 25,29,30,37,39. 53,54,56,58,66 & 75
FISHERIES STATISTICS	...	18
FISHING METHODS AND GEAR		
Nets and net fishing	...	9 & 10
FROG FARMING	...	40
GENERAL REPORTS	...	1,26,34,36,41,45, 46,50,59,62 & 64
MORPHOLOGY,ANATOMY & HISTOLOGY	...	2 & 38
PHYSIOLOGY	...	31 & 51
PLANKTON	.	
Phytoplankton	...	57
Productivity	...	74
Zooplankton	...	3—5,7,8,22,28,48, 49,57 & 63
PREDATORS AND PREDATION CONTROL	...	19
SHELL FISH FISHERIES		
Crustacean fisheries	...	32
SYSTEMATICS Fishes	...	70 & 71
WEEDS AND WEED CONTROL		
General	...	17
Weed control	...	52

IV TAXONOMIC INDEX

(Based on the taxonomic terms of the Fishes, frogs, Prawns & Crabs occuring in the title and also in the body of the paper. The names of other groups appear as per their taxonomic status in the Animal Kingdom. Names of the authorities have been omitted from taxonomic terms.).

Acanthophthalmus goaensis	...	71
Acentrogobius neilli	...	29
Ambasys gymnocephalus	...	29
A. nama	...	37 & 41
A. ranga	...	37
A. urotaenia	...	29
Amblypharyngodon mola	...	35,37,41 & 44
Anabas sp.	...	21
Anabas testudineus	...	30 & 44
Anchoviella indica	...	29
Aphanius dispar	...	35
Aplocheilus blochii	...	35
Aristichthys nobilis	...	67
Aspidoparia morar	...	41
Barbus melanampyx	...	2
B. tetrazona	...	61
Barilius barna	...	35 & 41
B. barila	...	41
Brachirus orientalis	...	29
Brachydanio rerio	...	44
Caranx carangus	...	29
C. ignobilis	...	23
C. nigrescens	...	23
C. stellatus	...	23
Carassius auratus	...	61
C. carassius	...	35
Catla catla	...	16,27,34,37,41, 44,45, 46 & 75
Channa marulius	...	35 & 44
C. orientalis	...	35 & 44
C. punctatus	...	35 & 44
Channa spp.	...	19 & 21
C. striatus	...	35,37 & 44
Cirrhinus cirrhosa	...	34
C. mrigala	...	16,20,27,34, 35,37,38,41 44 , 46 & 75
C. reba	...	34,35,44,54 & 55

Clarias batrachus	...	13,21,31,44 & 55
Colisa fasciatus	...	37
Colisa sp.	...	21
Crossocheilus latius	...	16
Ctenopharyngodon idella	...	27,34,45,46, 65 & 67
Cynoglossus dubius	...	33
Cyprinus carpio	...	34,35,44,45, 46,65 & 67
Danio devario	...	35
Eleotris sp.	...	44
Eleutheronema tetradactylum	...	9
Esomus danrica	...	35
Gambusia affinis	...	35
Hara hara	...	44
Helestoma temminki	...	61
Hemiramphus gaimardi	...	29
Heteropneustes fossilis	...	35 & 39
Heteropneustes sp.	...	21
Hilsa sp.	...	26
Hyporhthalmichthys molitrix	...	12,34,45,46, 65 & 67
Ilisha elongata	...	-
Indocybium guttatum	...	43
Johnius carutta	...	70
Labeo bata	...	16,34,35 & 37
L. boga	...	16
L. boggut	...	35 & 58
L. calbasu	...	20,27,34,37,41, 44—46 & 53
L. fimbriatus	...	11,34 & 45
L. gonius	...	15,20,34 & 37
L. kontius	...	34
L. rohita	...	16,27,34,37, 44 —46 , 60 & 75
Labuca labuca	...	41
Lates calcarifer	...	29 & 44
Lebistes reticulatus	...	61
Lestidium blanci	...	69
L. japonicum	...	69
Lestidium ringins	...	69
L. speciosum	...	69
Lutianus argentimaculatus	...	29

L. johnii	...	29
L. kashmira	...	29
Macrobrachium lamarrei	...	32
Marropodus opercularis	...	61
Mastacembelus armatus	...	35
M. pancalus	...	35 & 44
Mollieusia sphenops	...	61
Mugil cephalus	...	42
M. corsula	...	42
M. macrolepis	...	42
M. parsia	...	10
Mystus gor	...	41
M. cavasius	...	37 & 41
M. gulio	...	29
M. seenghala	...	35 & 41
M. vittatus	...	37 & 44
Nandus nandus	...	44
Noemacheilus denisonii	...	35
N. rajasthanicus	...	35
Notopterus chitala	...	37
N. notopterus	...	41 & 44
Notopterus sp.	...	21
Ompok pabo	...	37
Osphronemus sp.	...	21
Oxygaster bacaila	...	35,37 & 41
O. clupeoides	...	35
O. phulo	...	41
Pampus chinensis	...	24
Parastromateus niger	...	24
Platycephalus indicus	...	29
Pterophyllum eimekei	...	61
Puntius amphibius	...	35 & 41
P. dobsoni	...	41
P. kolus	...	41
P. pulchellus	...	41
P. sarana	...	35,37,41 & 66
P. sophore	...	35,37 & 41
Puntius spp.	...	44
P. stigma	...	41
P. stoliczkanus	...	35
P. ticto	...	35 & 41
P. vittatus	...	35
Rana cyanophlyctis	...	40
R. hexadactyla	...	26

Rasbora daniconius	...	35,41 & 51
Rita rita	...	37 & 56
Setipinna phasa	...	25
Siganus javas	...	29
Silonia childrenii	...	41
Strongylura strongylura	...	29
Tetradon leopardus	...	29
T. lunaris	...	29
Therapon jarbua	...	29
T. puta	...	29
Thrissocles hamiltonii	...	29
Tilapia mossambica	...	44 & 67
Tor khudree	...	41
T. mussulah	...	41
Wallago attu	...	35 & 41
Xiphophorus helleri	...	61
X. maculatus	...	61
Zenarchopterus striga	...	71

SERIAL INDEX

(Serials are abbreviated according to FAU's World list of Periodicals for Aquatic Sciences and Fisheries "and Insdoc's" Directory of Indian Scientific Periodicals, 1968. Reference is given to the serial number of the entry).
